

**innovative**  
design & build

ABM Design & Build – Providing an integrated turn-key design, construction and project management service to government agencies and private developers.

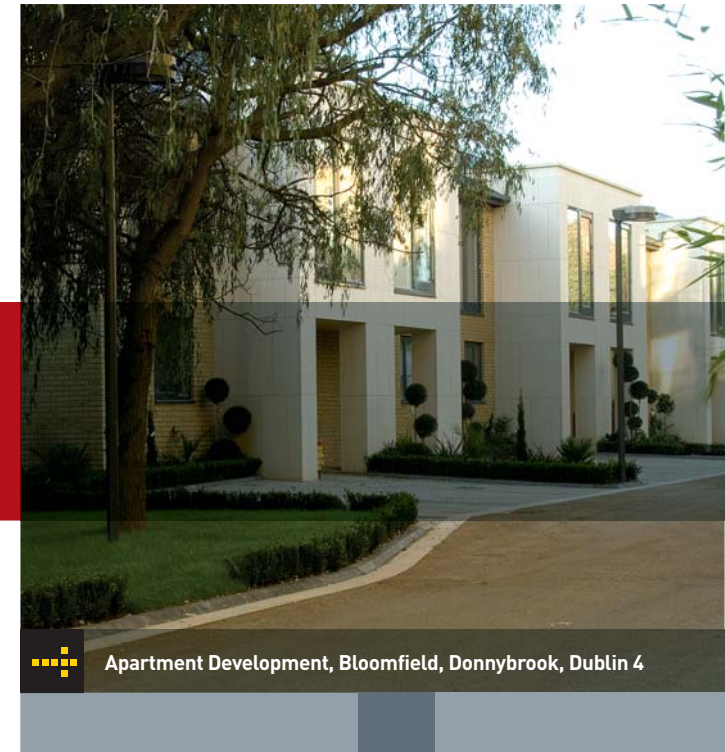

**specialists**

ABM is an established and successful construction and civil engineering company with an impressive track record and a demonstrable commitment to quality and customer service. Headquartered in Ireland, ABM also has operations in the UK, the Czech Republic, Slovakia and Poland.

There are five divisions of ABM:

- ABM Construction
- ABM Design & Build
- ABM Bridge Systems
- ABM Precast Solutions
- ABM Mosty

Apartment Development, Bloomfield, Donnybrook, Dublin 4

# cost time quality

Our design and build approach is a one-stop-shop; from planning through to design and construction phase. Clients can be confident of a consistent, streamlined, cost and time efficient project which is strategically managed at each stage by a single contractor.

ABM Design & Build offers the client single source project delivery. We deliver on time, on track, on budget!

Mountainview Court, Dublin 1, Proposed Development for Dublin City Council

# reliability

Project performance is strategically managed through client meetings, regular design team reviews and the production of detailed documentation to monitor and control all phases of the process

A hands-on management approach to the supervision of projects and an unwavering commitment to speedy, reliable programme delivery are the key ingredients to our success.

 Mountainview Court, Dublin 1, Proposed Development for Dublin City Council

Sneem Hotel, Goldens Cove, Sneem, Co. Kerry

All projects carried out by ABM Design & Build are covered by our Professional Indemnity Insurance. This gives ABM the authority to “sign-off” completed projects with compliance certification.

Where accountability and trust are paramount, ABM Design & Build delivers!

# accountability

# innovative & resourceful

Using the most advanced architectural and structural engineering design technology and computer software, ABM Design & Build creates value engineered structures.

An in-house team of structural engineers, designers and technicians collaborate to ensure versatility and the constructability of the design. A key feature of the process is the time spent in the early planning stages to resolve potential difficulties.

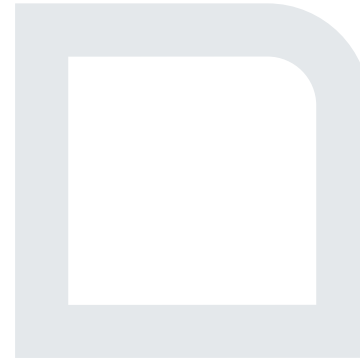

We offer innovative and resourceful solutions to complex construction challenges.

St. Patrick's New Primary School, Diswellstown, Dublin 15

# solid reputation

Our project portfolio covers a wide range of structures, including the following:

- Logistical Warehousing
- Hotel/Leisure
- Apartments
- Corporate Headquarters
- Schools
- Healthcare Facilities
- Industrial/Business Parks

Working to the highest industry standards; ABM Design & Build has gained a notable reputation for commitment to quality control, quality assurance and quality improvement in all our processes.

ABM Design & Build is accredited to Quality Management Standard EN 150 9001: 2000 since 1998 and achieved Health & Safety Safe-T-Cert. accreditation in September 2007.
