

ABM HELP RESTORE ROMAN ROADS!

Road improvements are underway in Nottinghamshire with the recent commencement of a £220 million project by Balfour Beatty to convert a single carriageway to a dual two-lane road on 28km of the A46 between Newark and Widmerpool.

As a Roman road the existing A46 is generally straight, but follows the undulating landscape, giving forward visibility and overtaking problems. In addition, with nearly 300 direct private accesses, 19 "T" junctions and 9 at grade junctions, this section of the A46 has a higher than average accident record for roads of this type.

HANDLOVA BYPASSES HISTORIC CENTRE

Patient commuters of Handlova City continue to look forward to the long-awaited completion of the bypass of the historic city centre. The 540m long stretch of urban road development will bring great relief to the famed traffic jams in the city & ABM have had a key role in the project by building the sole bridge on the project that spans over the River Handlovka.
