A630 CATCLIFFE BYPASS

The A630 is a dual carriageway that connects Sheffield with the lifeblood of the north – the M1. Carrying 50,000 vehicles a day between the city and the motorway. Burrowed beneath the A360 was a vehicle underpass that fed local traffic within the Catcliffe, Brinsworth and Sheffield City Airport area. The task confronting Osborne was the construction of a new subway designed specifically for non-motorised traffic to run parallel to the existing bypass.
