

KEEPING THINGS STABLE!

Years of heavy traffic around Shenstone Station in Staffordshire has taken its toll on the adjacent bridge approach embankments and led to an innovative stabilisation project.

THE LAST LINK IN THE STOWMARKET RELIEF ROAD

ABM Precast Solutions have completed supply of three pre-stressed beam bridge structures (two river and one rail) to Birse Civils for the B1115 Stowmarket Relief Road. The final bridge, the railway crossing, designed to ease an infamous level crossing traffic bottle-neck, provided a significant challenge.

BROAD GAUGE RETURNS!

The need to increase the rail gauge clearance to accommodate increased W10 size freight wagons recently led to the replacement of the traditional brick arch structure at Gipsy Lane in Nuneaton.
