

GETTING BIGGER...

In recent months several of the largest precast components manufactured at our Tuxford site have been delivered to sites across the country. With the capacity to manufacture units in excess of 100 tonnes and up to 30 metres long, the only restrictions on what can be precast and delivered are on the route to site.

AND SMALLER.....

As our production for the civil engineering industry brings bigger challenges, ABM Precast Solutions have also recently started production of post support blocks for easi-edge's 'hoard-it' system. The units may only be ½ tonne each, but the numbers are big!

THE FIRST OF MANY!

One of the country's fastest moving road construction projects is underway on the A46 east of Nottingham. ABM recently delivered 18 Y6 beams, each 22m long which were installed in a two day operation for the first of several underbridge decks.
